PLACE ACQUIRED

REFERENCES

25X1

1. The average depth of Ustka (Stolpmuende) port is four meters.
2. The M.S. GDYNIA was [redacted] a Soviet ship with her name GDYNIA inscribed in Cyrillic script.<sup>1</sup>
3. The following floating docks are located at the Paris Commune Shipyard in Gdynia:
  - a. 1 dock, approximately 10,000 tons, [redacted] It has two cranes, one in each wing.
  - b. 2 docks, approximately 5,000 tons each, both of Polish production; one is not quite finished. Neither dock has any cranes.

The large dock is lying in the middle of the two smaller ones, which are tied up to the large dock. The crane of the large dock simultaneously serves the smaller dock lying alongside.

4. [redacted] only regular shipyard employees of the Paris Commune Shipyard were compelled to undergo antiaircraft defense exercises. Seamen posted to work in the shipyard "per day" by the Reserve Department of the P.L.O. (Polish Ocean Lines) did not take part. The training consisted exclusively of (theoretical) lectures and took place during normal working hours. The date of each lecture was announced separately by a loudspeaker in the shipyard, shortly before it was due to begin.

1. [redacted] Comment: It was previously reported that the name of the M.S. GDYNIA was changed to STAVROPOL.
